

66KV SUBSEA ARRAY CABLE

Overview: Three-core submarine power cable with XLPE insulation and integrated fiber optic cable for offshore wind farm inter-array grid.

Technical Parameters

Rated Voltage (Uo/U)	36/66 kV
Maximum System Voltage (Um)	72.5 kV
Conductor Material	Copper or Aluminum (Water-blocked)
Cross-Sectional Area	400 - 800 mm²
Insulation	Cross-linked Polyethylene (XLPE)
Armor	Single wire armor (Galvanized Steel) with bitumen
Integrated Fiber Optic	48-core Single Mode (SM)
Minimum Bending Radius (Dynamic)	3.5 meters
Weight in Air	Approx. 35 - 50 kg/m (depending on cross-section)
Design Life	25 Years

CONFIDENTIAL - INTERNAL PROTOTYPE DATA
