

MONOPILE TRANSITION PIECE (TP)

Overview: Primary structural interface between the driven monopile foundation and the wind turbine generator tower, including secondary steel outfitting.

Technical Parameters

Base Material Grade	S355G10+M / S460G2+M structural steel
Outer Diameter (Bottom/Top)	6.5m / 4.5m (Typical)
Overall Height	20 - 25 meters
Total Weight (Outfitted)	350 - 500 Metric Tonnes
Flange Flatness Tolerance	Max 2.0 mm over entire circumference
Corrosion Protection (Internal)	Dehumidification system ready
Corrosion Protection (External)	NORSOK M-501 System 7 (Splash Zone)
Secondary Steel	External boat landing, internal ladders, platforms
Grout Seal System	Active / Passive dual seal combination
Design Standard	DNV-ST-0126
