

SUBSEA J-TUBE SEAL

Overview: Diverless installation mechanical seal used to secure and protect the 66kV array cable entry into the foundation J-Tube.

Technical Parameters

Cable Outer Diameter Range	120 mm - 180 mm
J-Tube Inner Diameter Range	300 mm - 450 mm
Pressure Rating	3.0 Bar (Minimum internal/external)
Primary Seal Material	High-grade Polyurethane (Hydrolysis resistant)
Hardware Material	Super Duplex Stainless Steel / Inconel 625
Installation Method	Diverless pull-in (ROV actuatable)
Centralization	Integrated internal centralizers
Corrosion Protection	Inherent material properties + small CP anodes
Design Life	25 Years
Testing	Hyperbaric pressure tested prior to delivery
